At the moment, the available source code is limited to the software which composes **VDD**, such as **LT
SP**
,
XEN
,
UML
,
X.org
and
Xephyr
, that you can find at the following links:

- LTSP: http://wiki.ltsp.org/twiki/bin/view/Ltsp/DownLoads
- XEN: http://www.xen.org/products/downloads.html
- X.ORG http://ftp.x.org/pub/
- XEPHYR: http://www.freedesktop.org/wiki/Infrastructure/git/Users

and the scripts that constitute the base of the GUI . In order to configure and integrate all components, please use our howtos and documentation. All the source code is available under GPL license, of course.
